Dynamics of Ternary Mixtures with Photosensitive Chemical Reactions: Designing Three Dimensional Ordered Composites

Olga Kuksenok Rui D. M. Travasso Anna C. Balazs

Chemical Engineering Department University of Pittsburgh Pittsburgh, PA

to create variety of multi-components defect-free structures

Rui Travasso, Thursday, W12.00014

Langmuir 2000 22(6), 2620

Conclusions

□ Harnessing photochemical reactions to:

- Create multi-component three-dimensionally ordered materials
- The Write with the C component using light higher intensity light

The Advantages: technique is reversible and non-invasive
